Status	Finished
Started	Tuesday, 20 October 2026, 6:14 PM
Completed	Tuesday, 20 October 2026, 6:25 PM
Duration	10 mins 41 secs
Grade	**14.00** out of 15.00 (**93.33**%)

Question **1**

Complete

Mark 1.00 out of 1.00

Which Python function would you use to sort a list in-place?

a. sorted()
b. order()
c. arrange()
d. sort()

The correct answer is: sort()

Question **2**

Complete

Mark 1.00 out of 1.00

What is one advantage of sorting a list before performing a search operation?

a. It makes the search operation slower
b. It increases the number of comparisons needed
c. It has no effect on the search operation
d. It allows for faster searching

The correct answer is: It allows for faster searching

Question **3**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm is based on repeatedly dividing the list into halves?

a. Bubble Sort
b. Merge Sort
c. Insertion Sort
d. Quick Sort

The correct answer is: Merge Sort

Question **4**

Complete

Mark 1.00 out of 1.00

The process of placing or rearranging a collection of elements into a particular order is known as

a. Rearranging

b. Merging

c. Searching

d. Sorting

The correct answer is: Sorting

Question **5**

Complete

Mark 1.00 out of 1.00

What is the primary benefit of using sorting algorithms in programming?

a. Makes data harder to manage

b. Makes code execution slower

c. Provides a basis for other algorithms to work efficiently

d. Decreases the efficiency of algorithms

The correct answer is: Provides a basis for other algorithms to work efficiently

Question **6**

Complete

Mark 1.00 out of 1.00

How does Merge Sort achieve its efficiency?

a. By breaking the input into smaller parts and merging them

b. By comparing elements sequentially

c. By using the bubble-up method

d. By sorting data in a single pass

The correct answer is: By breaking the input into smaller parts and merging them

Question **7**

Complete

Mark 1.00 out of 1.00

Which of the following is a key reason for the importance of sorting algorithms?

- a. Sorting helps in finding duplicates quickly
- b. Sorting decreases the efficiency of selection operations
- c. Sorting makes it harder to search for items
- d. Sorting is rarely used in programming

The correct answer is: Sorting helps in finding duplicates quickly

Question **8**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm would be preferred for its divide-and-conquer approach?

- a. Merge Sort
- b. Linear Search
- c. Bubble Sort
- d. Binary Search

The correct answer is: Merge Sort

Question **9**

Complete

Mark 0.00 out of 1.00

Very slow way of sorting is_____

- a. Heap sort
- b. Quick sort
- c. Bubble sort
- d. Insertion sort

The correct answer is:
Insertion sort

Question **10**

Complete

Mark 1.00 out of 1.00

In Merge Sort, what happens after the two halves of the list are sorted?

- a. They are combined to form a single sorted list
- b. They are discarded
- c. They are split again into smaller sublists
- d. They are compared element by element

The correct answer is: They are combined to form a single sorted list

Question **11**

Complete

Mark 1.00 out of 1.00

Which algorithm typically follows a divide-and-conquer structure?

- a. Bubble Sort
- b. Linear Search
- c. Merge Sort
- d. Binary Search

The correct answer is: Merge Sort

Question **12**

Complete

Mark 1.00 out of 1.00

Why is it advantageous to sort data before performing duplicate analysis?

- a. It has no effect on the analysis process
- b. It complicates the analysis process
- c. It makes the analysis slower
- d. It allows for quicker identification of duplicates

The correct answer is: It allows for quicker identification of duplicates

Question **13**

Complete

Mark 1.00 out of 1.00

Which sorting algorithm is known for its simplicity and sequential comparison of elements?

- a. Bubble Sort
- b. Quick Sort
- c. Heap Sort
- d. Merge Sort

The correct answer is: Bubble Sort

Question **14**

Complete

Mark 1.00 out of 1.00

Which algorithm is efficient for analyzing the frequency distribution of items in a list?

- a. Bubble Sort
- b. Quick Sort
- c. Linear Search
- d. Merge Sort

The correct answer is: Merge Sort

Question **15**

Complete

Mark 1.00 out of 1.00

What type of problems can sorting help solve efficiently?

- a. Selection
- b. Duplicates
- c. Searching
- d. All of the above

The correct answer is: All of the above
